Dear Enrico,

We are proud to offer you a copy of "This is how Dutch healthcare works", an atlas of the healthcare system in the Netherlands. The publication is an initiative of VvAA (a Dutch member organization for healthcare professionals) and The Argumentation Factory (a Dutch company that helps organizations come to grip with complex problems), in collaboration with the LAD, the Dutch Association of Salaried Doctors, and some other health organizations.

The atlas provides a comprehensive picture of the unique Dutch healthcare system, which can count on great interest from other countries in the world. The healthcare system in the Netherlands is characterized by well-developed primary care, compulsory basic healthcare insurance carried out by private insurers, competition between healthcare providers, a considerable scientific output and a strong push to put patients in the lead. The book offers an overview that will guide you through the healthcare system in all facets: its organisation, legislation, funding and more.

The atlas is based on the successful Dutch book "Zó werkt de zorg in Nederland". The Dutch Presidency of the European Union in the first half of 2016 provided the perfect occasion to translate this book and inform a wider international audience about the Dutch healthcare system.

We hope the book will help give you a thorough understanding of the mechanism underlying the Dutch healthcare system!

With kind regards,

Christiaan Keijzer,  
president LAD
